

Mobility Management

Mission Control for your Mobile Workforce

Challenge: How does an enterprise manage, track and control the proliferation of wireless devices within the enterprise? According to the research firm Gartner, the number one management struggle for more than 75% of enterprises is mobile technology. Businesses can greatly benefit from implementing a mobility solution to address the challenges with a remote workforce:

Highlights and Benefits

- Increase Productivity
- Control Costs
- Secure Data
- Easily Manage
- Improve Forecasting
- Real Time
- Group Management
- Enterprise Integration
- Save Time

- Reduce overall wireless spend with flexible reporting that simplifies management and analysis of multiple devices, contracts and providers.
- Increase productivity by centrally managing wireless devices from multiple carriers.
- Ensure that devices are compliant with corporate policies

Researched based on the following organizations:

Gartner

Solution: TCS Mobility Management is a suite of managed services that allows your company to securely manage the wireless devices, data, and user profiles throughout your enterprise.

“The potential scope of these technologies is huge. The number of physical assets, as well as products, that could one day be monitored or managed exceeds the number of computers and PDA’s in the world by several orders of magnitude.” - Forrester Research
